FOR IMMEDIATE RELEASE

Marcello Strada Sales Growing Through its Family of Distributors

Comiso, Italy (February 14, 2023) – As interest in preserving memories through photobooks proliferates, the economical manual and semi-automatic air-powered photobook systems from Marcello Strada will operate in almost any location. With COVID restrictions being lifted, the company is expanding its family of distributors to bring photobook making to every country, with no initial upfront costs for one demonstration machine and a supply of adhesive cardboard inserts. To learn more about this opportunity, visit:

<https://www.photobook-machine.com/moreinformationfordistributors.pdf>

Requiring no specialized training, these bookbinding systems are easy to operate and maintain by one person in small photography/printing or other companies with limited space and resources. Our acid-free adhesive cardboard inserts, available in movable or permanent glue, can be used in either cold- or hot- mount bookbinding systems and provide the possibility of unique layflat designs with 2-, 3- or even 4- panels. All our supplies are non-toxic and eco-friendly.

Based in Comiso, Italy, with availability in 122 countries, our family-run company was founded in 2007 and is led by our founder and president Marcello Strada. Benefitting from his more than 30 years of experience in the photo imaging field, he has created bookbinding systems with the reliability and minimal support required to assist photo labs, printers and retailers in the production of photographic and non-photographic albums and books. All our precision-made machines are pneumatically powered, requiring only a locally available air compressor to operate. No special knowledge is needed to control or maintain our machines. They are manufactured in Italy to meet all stringent EU requirements.
